Vidit Jain | 2020101134

A Kishore Kumar | 2020101126

Edits made to our Mini-world

- We removed the "Coach" attribute from the team, as we defined the coach relationship to be between a player and another player, not between a player and a team.
- We gave weak entities partial keys to make the ER model diagram more specific
 - Abilities Entity - Name was made the partial key
 - Round Entity - Round number was used as the partial key

Foreign Keys cannot be represented in an ER diagram, hence we didn't represent those attributes in our model.
